

## NATIONAL GUARD KIT W/HYDRATION

### NATIONAL GUARD KIT WITH PROMASK 2000 & HYDRATION

#### NIOSH APPROVED:

TC-23C-2308

The National Guard PAPR Kit with Hydration was originally developed with, and issued to, the National Guard CERF-P teams and is designed to provide respiratory protection in the event of a WMD incident in a non-IDLH environment. The added protection of positive airflow was deemed necessary for completing tasks required such as search, rescue, recovery and decontamination. The N-60175-001 updates the standard kit to include a complete hydration system, mask and filter pouch, and filter covers.

Due to its military origins, the C420 blower, by design, is air-tight and can be effectively decontaminated of toxic particulates, chemicals, and all known military CBRN agents. A field-installable hydration port may be installed in either Promask 2000 filter port and connects to a hydration system.

A tactical gas mask pouch is included for convenient storage of the Promask 2000 when not in use.

#### FEATURES:

- Lightweight, Low-profile & Comfortable
- Reduces Pulmonary Stress
- Preserves Strength and Mental Acuity
- Complete Hydration System
- Maximum Protection at Affordable Price
- Helps Ensure Mission Success
- Higher Protection Factor than Mask alone
- Decontaminable
- Battlefield proven technology

#### APPLICATIONS:

- Search & Rescue
- Recovery
- Decontamination Teams
- First Responder
- First Receiver
- Meth Lab Clean Up
- SWAT
