

SCHMARTAF INFANT PROTECTIVE WRAP

SCHMARTAF INFANT PROTECTIVE WRAP

FOR INFANTS THROUGH AGE 3

Designed for infants up to 3 years of age, the Schmartaf Infant Protective Wrap is one of the finest infant protective wraps on the market today. The wrap allows the parent to effectively care for the infant without jeopardizing its respiratory health. The Schmartaf Infant Protective Wrap has a battery-powered blower which uses LiSo2 batteries and provides positive pressure to the infant through an NBC filter canister into the protective wrap. The positive pressure within the wrap prevents entry of contaminated air, providing a high protection factor for the infant or toddler. The parent can also feed the infant without breaking any seals by using the built in bottle. All materials, including the filtration, are NBC (Nuclear-Biological-Chemical) rated. Schmartaf is extremely light and provides mobility to the infant.

EACH KIT INCLUDES:

- Protective Hood
- Blower System
- Long-Life Batteries
- NBC Filter Canister
- Drinking System
- Instruction Manual
- Carrying Case

FEATURES:

- Effective against all types of chemical and biological warfare agents.
- High-quality blower unit and filter.
- Blower unit provides 45 liters (2 cubic feet) of filtered air per minute at an overall resistance of up to 35mm water and operates on 3 volts of power.
- Operates at full-efficiency for more than 10 hours in contaminated environment.
- 10-year shelf life for materials, blower unit and battery.

BENEFITS:

- Protects the head and respiratory system.
- The wrap can be placed on the baby when it is lying down or sitting up.
- Allows easy handling and care for the infant.
- The blower kit is easy to prepare for use.
- Drinking bottle included.
- The infant can walk on his/her own with the blower on its back or can be carried.
- Optional carrier strap included (not necessary for protection).
- Easily cleaned and maintained.
